
SUSTAINABILITY

Keywords Master List, Sources & LinkedIn Post Prompts

PART 1 — KEYWORD MASTER LIST

Use these keywords to set Google Alerts, configure RSS feeds, power news API queries, and build automated scraper logic for your Sustainability Radar. Keywords are grouped by theme. Combine keywords across categories for advanced Boolean searches.

1. Core ESG Terms

ESG	environmental social governance	ESG investing
ESG reporting	ESG ratings	ESG disclosure
ESG data	ESG strategy	ESG framework
ESG compliance	ESG metrics	ESG performance
ESG score	ESG fund	ESG bonds
ESG risk	ESG policy	ESG regulation
ESG greenwashing	ESG audit	ESG criteria
ESG integration	ESG due diligence	ESG materiality
double materiality	ESG backlash	anti-ESG
ESG politicization	ESG rollback	ESG pushback
ESG fund closures	ESG ETF	ESG screening
ESG board governance	ESG assurance	ESG committee
ESG benchmarking	ESG leadership	ESG controversy
ESG litigation	ESG washing	ESG label
ESG certification	ESG index	ESG data gap
ESG standardization	ESG convergence	ESG momentum
ESG transparency	ESG accountability	ESG KPIs
ESG target	ESG pledge	ESG commitment
ESG roadmap	ESG maturity	ESG ambition
ESG gap analysis	ESG peer comparison	ESG best practice
ESG baseline	ESG benchmark	ESG progress report
ESG annual report	ESG update	ESG watch
ESG alert		

2. Climate Change & Global Warming

climate change	climate crisis	global warming
climate action	climate risk	climate finance
climate disclosure	climate targets	climate policy
climate adaptation	climate resilience	climate mitigation
climate justice	climate emergency	climate tech
climate innovation	climate accountability	climate diplomacy
climate equity	climate modeling	climate tipping points
climate attribution	climate sensitivity	climate overshoot

climate feedback loops	planetary boundaries	1.5 degree target
2 degree target	Paris Agreement	COP30
COP31	IPCC report	IPCC AR7
climate science	climate projections	sea level rise
ocean acidification	ocean warming	permafrost thaw
Arctic ice loss	glacier retreat	extreme weather
heat waves	droughts	floods
wildfires	hurricanes	cyclones
climate migration	climate refugees	loss and damage
Warsaw mechanism	Bridgetown initiative	climate reparations
climate debt	climate colonialism	climate vulnerability index
climate readiness	national climate plan	NDC
nationally determined contribution	long-term low emission strategy	LT-LEDS
global stocktake	net zero by 2050	net zero by 2070
carbon neutrality deadline		

3. Carbon & Emissions

net zero	net-zero emissions	carbon neutral
carbon neutrality	carbon negative	carbon positive
decarbonization	deep decarbonization	greenhouse gas emissions
GHG emissions	Scope 1 emissions	Scope 2 emissions
Scope 3 emissions	Scope 3 category 1	Scope 3 category 11
Scope 3 category 15	value chain emissions	avoided emissions
carbon footprint	product carbon footprint	carbon budget
carbon pricing	carbon tax	carbon credits
carbon markets	carbon offsets	carbon removal
carbon capture	carbon sequestration	carbon sink
carbon border adjustment	CBAM	voluntary carbon market
compliance carbon market	carbon accounting	direct air capture
DAC	bioenergy carbon capture	BECCS
nature-based carbon	soil carbon	enhanced weathering
ocean carbon removal	biochar	blue carbon
carbon registry	carbon standard	Gold Standard
Verra VCS	Article 6 Paris	carbon credit quality
additionality	permanence	co-benefits carbon
carbon project	carbon developer	carbon buyer
carbon broker	carbon fund	carbon insetting
insetting vs offsetting	internal carbon price	shadow carbon price
carbon floor price	methane emissions	NOx emissions
fugitive emissions	black carbon	short-lived climate pollutants

fluorinated gases	F-gases	HFCs
emissions inventory	Scope 3 inventory	GHG protocol
ISO 14064	emissions factor	emission intensity
absolute emissions	carbon efficiency	low-carbon economy
zero-carbon		

4. Sustainability — General

sustainability	sustainable development	sustainable business
corporate sustainability	sustainability reporting	sustainability strategy
sustainability goals	sustainability targets	sustainability framework
sustainability leadership	sustainability transformation	sustainability officer
Chief Sustainability Officer	CSO	sustainability team
sustainability department	sustainability budget	sustainability roadmap
sustainability plan	sustainability scorecard	sustainability performance
sustainability disclosure	sustainability assurance	sustainability communication
sustainable supply chain	sustainable procurement	sustainable sourcing
sustainable finance	green finance	sustainable investment
impact investing	responsible investing	SRI investing
sustainable growth	long-term value creation	shared value
stakeholder capitalism	purpose-driven business	B Corp certification
triple bottom line	people planet profit	social enterprise
sustainability maturity model	sustainability index	sustainability ranking
Dow Jones Sustainability Index	DJSI	MSCI ESG
Sustainalytics	FTSE4Good	Bloomberg ESG
CDP A-list	sustainability award	sustainability report
integrated report	non-financial reporting	sustainability accounting
SASB	GRI standards	IIRC
Value Reporting Foundation		

5. Circular Economy & Waste

circular economy	circular economy model	circular design
circular business model	product as a service	servitization
waste reduction	zero waste	waste management
waste hierarchy	reduce reuse recycle	upcycling
downcycling	closed loop	material circularity
resource efficiency	resource recovery	extended producer responsibility
EPR	product stewardship	take-back scheme
deposit return scheme	eco-design	design for disassembly
design for recyclability	durability	repairability

right to repair	product lifetime extension	remanufacturing
refurbishment	spare parts availability	plastic waste
plastic pollution	plastic treaty	UN plastics treaty
single-use plastics ban	microplastics	nanoplastics
ocean plastics	plastic recycling	chemical recycling
mechanical recycling	plastic credit	plastic offset
ocean-bound plastic	food waste	food loss
food recovery	anaerobic digestion	composting
organic waste	landfill diversion	landfill tax
e-waste	electronic waste	WEEE directive
battery recycling	textile waste	fashion waste
circular fashion	clothing rental	construction waste
demolition waste	material passport	industrial symbiosis
urban mining	waste-to-energy	

6. Biodiversity & Nature

biodiversity	biodiversity loss	species extinction
habitat destruction	biodiversity net gain	nature positive
30x30 target	nature recovery	ecosystem restoration
EU restoration law	rewilding	ecosystem services
natural capital	natural capital accounting	TNFD
Taskforce on Nature-related Financial Disclosures	IPBES	Convention on Biological Diversity
CBD	Kunming-Montreal framework	global biodiversity framework
biodiversity COP	COP16	nature-based solutions
NbS	green infrastructure	blue-green infrastructure
wetland restoration	peatland restoration	mangrove restoration
coral reef restoration	ocean sustainability	marine protected area
sustainable fisheries	overfishing	MSC certification
aquaculture sustainability	deforestation	illegal logging
sustainable forestry	FSC certification	REDD+
zero deforestation commitment	EUDR	EU deforestation regulation
land use change	land degradation	soil health
regenerative land use	pollinators	bee decline
pesticide reduction	agroecology	invasive species
wildlife trafficking	CITES	poaching
biodiversity credits	nature credits	habitat banking
wetland banking	biodiversity offsetting	species at risk
IUCN red list	blue carbon	mangroves
seagrass	saltmarsh	coastal ecosystem

freshwater biodiversity	water ecosystem	river restoration
-------------------------	-----------------	-------------------

7. Water & Oceans

water stewardship	water scarcity	water stress
water security	water risk	water footprint
water efficiency	water recycling	water reuse
wastewater treatment	industrial water use	water pollution
groundwater depletion	aquifer depletion	freshwater availability
transboundary water	water governance	water pricing
virtual water	water-food-energy nexus	CDP water
water disclosure	Alliance for Water Stewardship	AWS
ocean pollution	ocean plastic	ocean acidification
ocean warming	sea level rise	coastal flooding
storm surge	saltwater intrusion	marine biodiversity
coral bleaching	kelp forests	deep sea mining
shipping emissions	maritime decarbonization	IMO 2030
IMO 2050	green shipping	ammonia shipping
methanol shipping	LNG shipping	sustainable aquaculture
blue economy	blue finance	ocean bond
water-positive	water neutrality	water net zero
flood risk	drought risk	extreme rainfall
water resilience		

8. Energy Transition

energy transition	clean energy	renewable energy
solar energy	wind energy	offshore wind
onshore wind	floating wind	solar power
utility-scale solar	distributed solar	rooftop solar
floating solar	agrivoltaics	solar curtailment
wind curtailment	hydropower	run-of-river hydro
pumped hydro	tidal energy	wave energy
geothermal energy	biomass energy	bioenergy
green hydrogen	blue hydrogen	grey hydrogen
hydrogen economy	hydrogen fuel cell	hydrogen electrolyzer
proton exchange membrane	green ammonia	e-fuels
synthetic fuels	power-to-X	battery storage
energy storage	lithium-ion battery	solid-state battery
flow battery	thermal energy storage	long-duration storage
grid battery	virtual power plant	demand response

demand flexibility	grid modernization	smart grid
microgrids	distributed energy	grid decarbonization
grid stability	grid resilience	capacity market
power purchase agreement	PPA	corporate PPA
sleeved PPA	renewable energy certificate	REC
guarantee of origin	GO	energy efficiency
industrial energy efficiency	building energy efficiency	net zero buildings
building retrofits	deep retrofit	passive house
LEED certification	BREEAM	green building
smart building	district heating	heat pump
electric heating	fuel switching	electrification
industrial electrification	heat decarbonization	EV adoption
electric vehicles	EV infrastructure	charging network
vehicle-to-grid	V2G	electric bus
electric truck	heavy duty EV	clean transportation
sustainable mobility	active travel	fossil fuel phaseout
coal phase-out	oil and gas transition	stranded fossil fuel assets
unburnable carbon	divestment	nuclear energy
small modular reactors	SMR	nuclear renaissance
energy poverty	energy access	energy justice
energy security	energy independence	energy resilience
LNG	gas transition	

9. Sustainable Food & Agriculture

sustainable agriculture	regenerative agriculture	agroecology
organic farming	precision agriculture	climate-smart agriculture
food systems	food security	food sovereignty
food justice	sustainable food	plant-based protein
alternative protein	lab-grown meat	cultivated meat
cell-based protein	fermentation protein	insect protein
algae protein	food innovation	AgriFood tech
vertical farming	controlled environment agriculture	urban farming
soil health	soil carbon	cover cropping
no-till farming	crop rotation	agroforestry
intercropping	permaculture	food waste
food loss	WRAP food waste	farm-to-fork strategy
EU farm to fork	sustainable fisheries	aquaculture sustainability
plant-based diet	flexitarian diet	dietary shift
food carbon footprint	sustainable packaging	bioplastics
compostable packaging	fair trade	Rainforest Alliance

sustainable palm oil	RSPO	deforestation-free supply chain
soy deforestation	cattle deforestation	water use agriculture
irrigation efficiency	drought-resistant crops	GMO sustainability
gene editing agriculture	CRISPR crops	animal welfare
factory farming	livestock emissions	methane from agriculture
nitrous oxide agriculture	fertilizer emissions	nitrogen pollution
eutrophication	pesticide reduction	integrated pest management

10. Regulations & Reporting Frameworks

CSRD	Corporate Sustainability Reporting Directive	ESRS
European Sustainability Reporting Standards	TCFD	Task Force on Climate-related Financial Disclosures
TNFD	Nature-related Financial Disclosures	GRI
Global Reporting Initiative	GRI standards	GRI universal standards
ISSB	International Sustainability Standards Board	IFRS S1
IFRS S2	SASB	sustainability accounting standards
CDP disclosure	CDP score	CDP A-list
CDP supply chain	SEC climate disclosure	SEC climate rule
US climate regulation	EU taxonomy	EU Green Deal
European Green Deal	EU sustainable finance taxonomy	SFDR
Sustainable Finance Disclosure Regulation	Article 8 SFDR	Article 9 SFDR
sustainable product SFDR	CSDDD	Corporate Sustainability Due Diligence Directive
supply chain law	EU due diligence	German supply chain act
LkSG	French Duty of Vigilance	Sapin II
UK Modern Slavery Act	California climate disclosure	SB 253
SB 261	Australia climate disclosure	ASRS
AASB sustainability	Japan sustainability disclosure	SSBJ
Japan TCFD	Singapore sustainability reporting	SGX
HKEX climate	India BRSR	SEBI sustainability
India ESG regulation	mandatory ESG disclosure	voluntary ESG disclosure
EU greenwashing directive	green claims directive	substantiation of green claims
Paris-aligned	science-based targets	SBTi
SBTi financial sector	Science Based Targets initiative	SBTi net zero standard
Principles for Responsible Investment	PRI	UN Global Compact
SDGs	Sustainable Development Goals	SDG alignment
SDG mapping	CBAM	carbon border adjustment mechanism

EU ETS	emissions trading scheme	cap and trade
Article 6 Paris Agreement	biodiversity regulation	EUDR EU deforestation regulation
REACH regulation	chemical regulation	RoHS directive
taxonomy-aligned	do no significant harm	DNSH
minimum social safeguards	double materiality assessment	CSRD materiality
IRO	impacts risks opportunities	sustainability assurance
IAASB	limited assurance	reasonable assurance
third-party verification	IOSCO sustainability	IAIS climate
Basel climate risk		

11. Sustainable Finance & Investing

green bonds	social bonds	sustainability-linked bonds
SLB	sustainability-linked loans	SLL
blue bonds	forest bonds	biodiversity bonds
social impact bonds	outcome-based financing	transition bonds
sovereign green bonds	municipal green bonds	green mortgage
green loan	green securitization	ESG funds
ESG ETF	ESG mutual fund	impact fund
blended finance	catalytic capital	concessional finance
climate finance	green finance	transition finance
just transition finance	sustainable investing	responsible investing
SRI	thematic investing	ESG integration
negative screening	positive screening	best-in-class
norms-based screening	shareholder engagement	active ownership
proxy voting ESG	say on climate	shareholder resolution
divestment campaign	fossil fuel divestment	engagement vs divestment
net zero asset managers	NZAM	net zero banking alliance
NZBA	net zero insurance alliance	NZIA
net zero asset owners alliance	NZAOA	Glasgow Financial Alliance for Net Zero
GFANZ	transition plan	net zero transition plan
credible transition plan	Paris-aligned benchmark	PAB
climate transition benchmark	CTB	sustainable index
ESG index	1.5C aligned portfolio	portfolio decarbonization
financed emissions	PCAF	Partnership for Carbon Accounting Financials
facilitated emissions	insurance underwriting ESG	insurance climate
climate insurance gap	climate stress testing	NGFS scenarios
physical risk modeling	transition risk modeling	stranded assets
climate litigation risk	fiduciary duty ESG	sustainable fiduciary
long-term value	private equity ESG	venture capital ESG

infrastructure ESG	real estate ESG	private debt ESG
hedge fund ESG	multilateral development banks	MDB climate finance
World Bank climate	development finance	DFI
IFC	ADB	AfDB
IADB climate	Article 6 finance	carbon project finance
REDD+ finance	philanthropy sustainability	foundation ESG
endowment ESG	pension fund ESG	sovereign wealth fund ESG
institutional ESG	retail ESG investing	ESG robo-advisor
ESG wealth management		

12. Corporate Strategy & Governance

corporate net zero pledge	net zero commitment	net zero roadmap
climate transition plan	Paris-aligned strategy	1.5C aligned business
carbon accounting	life cycle assessment	LCA
product carbon footprint	Scope 3 value chain	Scope 3 data collection
supply chain emissions mapping	supplier engagement	supplier sustainability
supplier scorecard	sustainable procurement	green procurement
responsible sourcing	ethical sourcing	fair trade certification
supplier code of conduct	internal carbon price	shadow carbon price
carbon inset	insetting vs offsetting	carbon reduction target
absolute target	intensity target	interim target
2030 target	2040 target	science-based targets for nature
SBTi approved	SBTi committed	just transition planning
workforce transition	green jobs	sustainability governance
ESG board committee	board sustainability oversight	board diversity
gender diversity board	independent director ESG	executive pay ESG
sustainability-linked remuneration	ESG bonus	CEO sustainability
Chief Sustainability Officer appointment	materiality assessment	double materiality assessment
stakeholder materiality	stakeholder engagement	stakeholder mapping
material topics	integrated thinking	integrated reporting
connectivity of information	non-financial reporting	voluntary disclosure
mandatory disclosure	sustainability audit	internal audit ESG
ESG risk management	climate risk governance	TCFD governance pillar
climate scenario analysis	physical risk assessment	transition risk assessment
climate opportunity	B Corp certification	purpose-driven company
social enterprise	benefit corporation	stakeholder capitalism
long-termism	ESG communications	sustainability PR
purpose communications	green marketing	greenwashing risk
greenhushing	impact washing	SDG washing

purpose washing	social washing	rainbow washing
-----------------	----------------	-----------------

13. Industry & Sector Decarbonization

hard-to-abate sectors	heavy industry decarbonization	steel decarbonization
green steel	hydrogen-based steelmaking	DRI
cement decarbonization	green cement	low-carbon concrete
supplementary cementitious materials	chemicals decarbonization	petrochemicals sustainability
green chemicals	aviation sustainability	sustainable aviation fuel
SAF	net zero aviation	CORSIA
IATA net zero	electric aircraft	hydrogen aircraft
shipping decarbonization	green shipping	IMO 2050
zero emission vessel	ammonia shipping	methanol shipping
LNG shipping	wind-assisted shipping	freight decarbonization
logistics sustainability	last mile delivery	electric truck
hydrogen truck	fleet electrification	EV fleet
cold chain emissions	refrigerant HFC	F-gas regulation
mining ESG	responsible mining	critical minerals
lithium mining	cobalt mining	nickel mining
copper mining	rare earth ESG	mining human rights
artisanal mining	ASM	conflict minerals
oil and gas decarbonization	upstream emissions	methane flaring
methane venting	methane abatement	oil gas net zero pledge
just transition oil gas	stranded fossil assets	carbon capture EOR
construction decarbonization	embodied carbon	operational carbon
net zero buildings	whole life carbon	retrofit at scale
textiles decarbonization	fashion sustainability	fast fashion impact
sustainable fashion brands	textile recycling	fibre innovation
plastic industry sustainability	packaging decarbonization	biobased plastics
pharma sustainability	healthcare carbon footprint	NHS net zero
tech sector sustainability	data center energy	cloud carbon footprint
semiconductor sustainability	electronic waste	AI energy use
financial sector emissions	financed emissions	insurance decarbonization
retail sustainability	FMCG sustainability	consumer goods ESG
automotive ESG	EV transition auto	mobility decarbonization
real estate decarbonization	property ESG	landlord tenant green lease
sports sustainability	event sustainability	hospitality ESG
tourism sustainability	sustainable travel	aviation offset
media sustainability	advertising ESG	digital carbon
streaming energy		

14. Just Transition & Social Equity

just transition	just energy transition	equity in transition
worker transition	green jobs	green workforce
reskilling workers	coal community transition	fossil fuel worker support
energy poverty	fuel poverty	access to clean energy
energy affordability	energy justice	climate justice
environmental justice	frontline communities	vulnerable communities
indigenous rights	free prior informed consent	FPIC
community benefit agreement	social license to operate	inclusive sustainability
equity diversity inclusion	DEI sustainability	gender and climate
women in sustainability	feminist climate policy	youth climate action
intergenerational equity	future generations	Global South climate
developing nations sustainability	climate reparations	loss and damage compensation
climate vulnerability	least developed countries	LDC climate
small island states	SIDS climate	Pacific climate
Africa just transition	Asia just transition	Latin America climate
social impact assessment	human rights impact assessment	health impact climate
mental health climate	eco-anxiety	climate grief
solastalgia	community resilience	

15. Social & Labor Rights

human rights due diligence	modern slavery	forced labor
child labor	bonded labor	labor trafficking
supply chain labor	living wage	fair wage
minimum wage	pay transparency	gender pay gap
equal pay	pay equity	pay ratio
worker wellbeing	employee wellbeing	mental health workplace
occupational health	health and safety	fatality rate
injury rate	trade union rights	freedom of association
collective bargaining	migrant worker rights	gig economy rights
platform worker	zero hours contract	precarious work
informal economy	diversity equity inclusion	DEI
racial equity workplace	gender diversity	board gender diversity
executive diversity	disability inclusion	LGBTQ+ inclusion
neurodiversity	social mobility	socioeconomic diversity
first-generation workforce	harassment policy	discrimination policy
speak-up culture	whistleblower protection	grievance mechanism
remedy access	community investment	social value

social impact	volunteering corporate	employee engagement sustainability
responsible recruitment	ethical recruitment	employment agency standards
conflict minerals	Dodd-Frank 1502	tin tantalum tungsten gold
cobalt child labor	DRC supply chain	responsible mineral sourcing

16. Governance & Business Ethics

corporate governance	board independence	non-executive director
board oversight	audit committee	risk committee
sustainability committee	executive remuneration	CEO pay ratio
pay-for-performance	shareholder rights	voting rights
dual class shares	stewardship	UK stewardship code
Japan stewardship code	investor stewardship	anti-corruption
bribery	FCPA	UK Bribery Act
zero tolerance corruption	tax transparency	tax avoidance
country-by-country reporting	BEPS	political contributions disclosure
lobbying transparency	data privacy	GDPR
data protection	cybersecurity ESG	responsible AI governance
algorithmic accountability	AI bias	digital rights
access to medicine	access to technology	IP access
affordable medicines	vaccine equity	animal welfare
factory farming	cage-free	fur-free
biodiversity in governance	nature governance	ocean governance
supply chain governance	third-party risk	supplier audit
whistle-blower protection	speak-up culture	ethics hotline
board ESG training	director ESG education	integrated governance
systems thinking	long-term governance	

17. Climate Tech & Innovation

climate tech	green tech	clean tech
climate innovation	climate venture capital	climate startup
climate unicorn	AI sustainability	AI for climate
machine learning ESG	sustainability software	ESG platform
carbon management software	emissions tracking software	ESG data provider
sustainability analytics	green AI	AI energy consumption
sustainable data centers	IoT sustainability	digital twin sustainability
smart building technology	precision agriculture technology	vertical farming tech
lab-grown meat tech	carbon capture technology	DAC technology
point-source capture	enhanced weathering technology	ocean alkalinity enhancement
biochar technology	soil carbon measurement	MRV technology

satellite carbon monitoring	remote sensing sustainability	drone agriculture
blockchain carbon credits	carbon registry blockchain	NFT carbon
ESG AI scoring	generative AI ESG	large language model sustainability
climate risk analytics	physical risk modeling software	transition risk modeling
scenario planning tool	climate scenario software	clean hydrogen technology
electrolysis technology	fuel cell technology	battery chemistry
next-gen battery	sodium-ion battery	solid-state battery
grid software	energy management system	building management system
demand flexibility platform	virtual power plant software	EV charging software
smart meter	energy monitoring	sub-metering
ISO 50001	water technology	water recycling tech
desalination	membrane technology	waste technology
recycling robot	optical sorting	chemical recycling plant
sustainable materials	bio-based materials	green chemistry
biomimicry	nature-inspired design	cradle-to-cradle design
fintech ESG	ESG robo-advisor	sustainable neobank
climate fintech	insurtech climate	parametric insurance
climate risk insurance		

18. Green Buildings & Urban Sustainability

green building	sustainable building	net zero building
LEED certification	BREEAM	WELL building standard
EDGE certification	passive house	nearly zero energy building
NZEB	building retrofit	deep retrofit
building decarbonization	embodied carbon buildings	operational carbon buildings
whole life carbon	green lease	landlord tenant ESG
GRESB	real estate ESG	smart building
building energy management	automated building controls	district heating
district cooling	heat network	energy community
urban sustainability	sustainable city	smart city
15-minute city	urban green space	urban biodiversity
urban heat island	green roof	living wall
urban tree canopy	parks access	sustainable urban mobility
active travel	cycling infrastructure	public transit decarbonization
transit-oriented development	sustainable housing	affordable green housing
social housing retrofit	planning for climate	climate-resilient design
flood-resilient design	sustainable infrastructure	green infrastructure
blue infrastructure	circular construction	construction waste
modular construction	mass timber	cross-laminated timber
CLT	engineered wood	low-carbon concrete

green cement	recycled aggregate	sustainable land use planning
brownfield redevelopment	urban regeneration	

19. Supply Chain & Procurement

sustainable supply chain	supply chain sustainability	supply chain emissions
Scope 3 supply chain	supplier decarbonization	supplier engagement
supplier assessment	supplier scorecard	supply chain transparency
supply chain traceability	supply chain mapping	sustainable procurement
green procurement	responsible procurement	procurement policy ESG
public procurement sustainability	ethical sourcing	responsible sourcing
sourcing standards	supplier code of conduct	supplier audit
third-party audit	supply chain due diligence	human rights supply chain
conflict minerals supply chain	deforestation-free supply chain	supplier diversity
diverse supplier	minority-owned supplier	SME sustainability
small business ESG	supply chain finance sustainability	supply chain resilience
supply chain risk ESG	nearshoring ESG	reshoring sustainability
just-in-time vs resilience	circular supply chain	reverse logistics
product take-back	packaging sustainability	transport emissions supply chain
cold chain sustainability	last mile sustainability	digital supply chain
supply chain visibility platform	blockchain supply chain	RFID traceability
farm-level data	raw material sustainability	commodity sustainability
cotton sustainability	Better Cotton Initiative	BCI
leather sustainability	wool sustainability	natural rubber sustainability
timber legality	FLEGT	coffee sustainability
cocoa sustainability	tea sustainability	soy sustainability
RTRS	palm oil sustainability	RSPO

20. Geopolitical & Regional ESG

India ESG	India sustainability	India climate policy
India renewable energy	India net zero 2070	India green hydrogen
SEBI sustainability	BRSR India	India ESG regulation
India solar mission	India wind energy	India EV policy
Asia Pacific ESG	ASEAN sustainability	ASEAN taxonomy
China ESG	China green economy	China carbon market
China ETS	China renewable energy	China green bond
China dual carbon goals	China net zero 2060	China green finance
Japan sustainability	Japan GX	Japan green transformation
Japan transition finance	Japan carbon pricing	Korea ESG
Korea green new deal	Korea carbon neutral	Taiwan ESG

Taiwan sustainability reporting	Taiwan carbon trading	Singapore ESG
MAS sustainability	Singapore green finance	Hong Kong ESG
HKEX climate	Hong Kong green finance	Australia climate policy
Australia safeguard mechanism	Australia ESG	New Zealand climate
New Zealand ETS	New Zealand net zero	EU sustainability regulation
EU taxonomy	EU green deal	EU ETS reform
EU CBAM	EU CSRD	EU CSDDD
EU SFDR	UK sustainability	UK TCFD mandatory
UK green finance strategy	UK net zero plan	UK emissions trading
UK SDR	US ESG regulation	SEC climate rule
US IRA	Inflation Reduction Act	US clean energy investment
US green infrastructure	US ESG backlash	Canada carbon tax
Canada clean electricity	Canada ESG	Brazil sustainability
Amazon deforestation Brazil	Brazil ESG	Mexico sustainability
Latin America ESG	Chile lithium ESG	Africa green energy
Africa just transition	Africa climate finance	South Africa just transition
South Africa coal transition	Middle East ESG	Gulf sustainability
Saudi Vision 2030 ESG	UAE sustainability	COP28 UAE
Abu Dhabi climate	Dubai sustainability	Turkey ESG
Turkey climate	Eastern Europe ESG	emerging markets ESG
developing nations climate	BRICS sustainability	climate diplomacy
G7 climate	G20 sustainability	UN climate
critical minerals geopolitics	battery supply chain geopolitics	energy security ESG
energy transition geopolitics		

21. ESG Data, Ratings & Disclosure

ESG data	ESG data quality	ESG data gap
ESG data standardization	ESG ratings	ESG rating methodology
ESG rating divergence	MSCI ESG rating	Sustainalytics ESG
ISS ESG	S&P ESG	Bloomberg ESG
Refinitiv ESG	FTSE Russell ESG	Moody's ESG
ESG score	ESG controversy score	ESG controversy monitor
ESG data provider	ESG vendor	ESG platform
ESG software	ESG data collection	ESG data aggregation
ESG data reporting	sustainability reporting platform	carbon accounting software
GHG data collection	emissions measurement	energy data management
ESG disclosure quality	voluntary disclosure	mandatory disclosure
materiality mapping	topic prioritization	impact assessment
double materiality matrix	IRO register	CSRD gap analysis
assurance readiness	data governance sustainability	audit trail ESG

third-party assurance	limited assurance statement	reasonable assurance
ISAE 3000	ISAE 3410	IAASB sustainability assurance
ESG taxonomy alignment	PAI indicators	principal adverse impacts
entity-level PAI	product-level PAI	SFDR PAI
non-financial KPI	sustainability KPI	ESG target tracking
real-time ESG data	alternative ESG data	satellite data ESG
AI ESG data	NLP sustainability	text mining ESG
supply chain ESG data	supplier data collection	CDP supply chain
ESG benchmark	peer comparison	sector average ESG
ESG index construction	index methodology	index rebalancing ESG

22. Climate Risk & Resilience

climate risk	physical climate risk	transition risk
liability risk	climate scenario analysis	NGFS scenarios
IEA scenarios	1.5C scenario	2C scenario
delayed transition scenario	orderly transition	disorderly transition
hot house world	chronic physical risk	acute physical risk
extreme weather risk	flood risk	drought risk
heat stress risk	wildfire risk	sea level rise risk
storm risk	cyclone risk	hurricane risk
supply chain climate risk	commodity price climate risk	energy price climate risk
water risk	food system risk	asset stranding risk
real estate climate risk	infrastructure climate risk	climate stress test
bank climate stress test	insurance climate risk	climate value at risk
climate VaR	portfolio climate risk	climate litigation risk
stranded assets	fossil fuel stranding	transition opportunity
green economy opportunity	climate solution market	adaptation investment
resilience investment	climate-proofing	infrastructure resilience
nature-based resilience	urban resilience	business continuity climate
operational risk climate	ESG risk integration	climate risk disclosure
TCFD report	climate risk register	taskforce climate related
TCFD governance	TCFD strategy	TCFD risk management
TCFD metrics targets	TCFD progress	

23. Communications & Reporting Terms

sustainability report	annual sustainability report	integrated report
ESG report	non-financial report	impact report
progress report	sustainability communication	ESG communication
green marketing	responsible marketing	authentic sustainability

brand purpose	greenwashing	greenwashing risk
greenwashing enforcement	greenwashing lawsuit	greenwashing fine
greenwashing ruling	greenwashing EU	greenwashing FTC
greenwashing ASA	greenhushing	silence on sustainability
ESG comms strategy	purpose communications	social impact storytelling
impact narrative	data visualization sustainability	sustainability infographic
sustainability video	sustainability campaign	ESG social media
LinkedIn ESG	sustainability LinkedIn	ESG thought leadership
sustainability podcast	ESG podcast	climate podcast
sustainability newsletter	ESG newsletter	climate newsletter
sustainability event	ESG conference	climate summit
sustainability award	ESG award	best sustainability report
GRI-aligned report	TCFD-aligned report	ISSB-aligned report
sustainability index entry	DJSI questionnaire	CDP questionnaire
stakeholder report	investor ESG presentation	ESG investor day
CDP disclosure	CDP response	CDP score improvement
ESG rating improvement	rating agency engagement	ESG investor engagement

Boolean Search Query Templates

Use these pre-built query strings in Google Alerts, news APIs, or platform search bars for precision filtering:

- "ESG" AND ("regulation" OR "policy" OR "disclosure") — regulatory updates
 - "net zero" AND ("2026" OR "2030") AND ("company" OR "corporate") — corporate pledges
 - "climate risk" AND ("investor" OR "finance" OR "disclosure") — climate finance
 - "sustainability report" AND ("CSRD" OR "ISSB" OR "GRI") — reporting news
 - "carbon market" AND ("voluntary" OR "compliance" OR "credit") — carbon markets
 - "green hydrogen" AND ("investment" OR "project" OR "deal") — hydrogen deals
 - "ESG" AND ("India" OR "Asia") AND "2026" — Asia-Pacific ESG
 - "decarbonization" AND ("steel" OR "cement" OR "shipping" OR "aviation") — hard-to-abate sectors
 - "greenwashing" AND ("lawsuit" OR "ruling" OR "fine") — greenwashing litigation
 - "science-based targets" AND ("approved" OR "committed" OR "withdrawn") — SBTi news
 - "CSRD" AND ("first filing" OR "compliance" OR "deadline") — CSRD updates
 - "biodiversity" AND ("TNFD" OR "nature positive" OR "disclosure") — nature finance
 - "just transition" AND ("coal" OR "oil" OR "gas" OR "workers") — worker transition
 - "supply chain" AND ("human rights" OR "forced labor" OR "modern slavery") — supply chain rights
 - "circular economy" AND ("plastic" OR "textile" OR "electronics" OR "packaging") — circularity
 - "physical risk" AND ("flood" OR "drought" OR "heat" OR "sea level") — physical climate risk
 - "energy transition" AND ("emerging markets" OR "developing" OR "Africa" OR "India") — global south energy
 - "sustainable finance" AND ("taxonomy" OR "green bond" OR "SLB" OR "transition") — green debt
-

PART 2 — RECOMMENDED SOURCES TO MONITOR

Monitor these platforms daily and weekly for news input to your Sustainability Radar. Prioritise dedicated ESG outlets for signal density, and major financial media for market-moving stories.

PART 3 — AI PROMPTS FOR LINKEDIN POST GENERATION

Use these prompts with any AI tool (Claude, ChatGPT, etc.) to generate LinkedIn posts from gathered news. Each prompt is optimised for a different content type. Replace the placeholder text in square brackets with your actual news input. For best results, provide the full article text rather than just the headline.

PROMPT 1 — General News to LinkedIn Post

You are a sustainability communications expert with deep knowledge of ESG, climate change, and corporate sustainability. You will be given one or more news headlines and/or article snippets.

Your task:

1. Identify the single most important insight from the news.
2. Write a LinkedIn post (150–220 words) that is professional, engaging, and insightful.
3. Start with a strong hook — a bold statement, surprising fact, or thought-provoking question.
4. Cover: what happened → why it matters → what professionals should watch.
5. End with a call to action (e.g. "What do you think?" or "How is your organisation responding?").
6. Add 6–8 relevant hashtags at the end.
7. Use 1–2 emojis for visual appeal — do not overdo it.

Tone: Authoritative but accessible. Not salesy. Not alarmist. Think: senior sustainability consultant sharing a genuine insight.

News input: [PASTE NEWS HEADLINE AND/OR SUMMARY HERE]

PROMPT 2 — Weekly Radar Digest Post (3–5 Stories)

You are a sustainability intelligence analyst creating a weekly LinkedIn roundup for ESG professionals.

You will receive 3–5 news stories from the past week on topics including ESG regulation, climate finance, energy transition, corporate net zero, and sustainability policy.

Your task:

1. Select the top 3 most impactful stories.
2. Write a LinkedIn post titled "Sustainability Radar — Week of [DATE]"
3. For each story, write 2–3 sentences: what happened + why it matters.
4. Separate each story with an emoji bullet.
5. Add a closing paragraph: "What to watch next week" with a brief forward-looking take.
6. Total length: 220–300 words.
7. Add 6–10 hashtags at the end.

Tone: Curated newsletter — like a trusted expert filtering the week's noise for busy professionals.

Stories input: [PASTE 3–5 NEWS SUMMARIES HERE]

PROMPT 3 — Regulatory Alert Post

You are a sustainability regulatory expert. A new ESG or climate regulation, framework, or policy update has been announced.

Your task:

1. Write a LinkedIn post (180–250 words) breaking down the regulatory development.

-
2. Structure: What changed → Who it affects → Key deadlines or requirements → What companies should do now.
 3. Open with a clear headline line (e.g. "CSRD Update: What You Need to Know").
 4. Use short paragraphs or a brief numbered list (max 4 points) for readability.
 5. End with a practical tip or resource recommendation.
 6. Add 5–7 relevant hashtags.

Tone: Expert compliance advisor — clear, practical, non-alarmist. Like a consultant briefing a C-suite.

Regulation/policy input: [PASTE REGULATION NAME, KEY DETAILS, AND DATE HERE]

PROMPT 4 — ESG Data & Research Insight Post

You are a sustainability data analyst and thought leader. You have a new ESG report, sustainability index, or climate data release.

Your task:

1. Extract the 2–3 most compelling data points or findings.
2. Write a LinkedIn post (160–230 words) that translates data into business-relevant insight.
3. Start with a striking statistic as the hook.
4. Explain what the data means for investors, companies, or policymakers.
5. Add your interpretation: Is this progress? A warning sign? A market signal?
6. End with an open question to drive engagement.
7. Add 5–8 hashtags.

Tone: Data-driven storyteller — numbers with meaning, not just numbers.

Report/data input: [PASTE REPORT NAME, KEY STATISTICS, AND SOURCE HERE]

PROMPT 5 — Corporate Sustainability Announcement Post

You are a corporate sustainability communications strategist. A major company has made a sustainability announcement — a net zero pledge, a new ESG target, sustainability report release, or green investment.

Your task:

1. Write a LinkedIn post (150–220 words) covering the announcement objectively and critically.
2. Structure: What was announced → What makes it significant (or not) → How it compares to industry peers → Key unanswered questions.
3. Add a credibility lens: Are targets science-based? Is there a credible transition plan?
4. End with a discussion prompt.
5. Add 5–7 hashtags.

Tone: Knowledgeable and balanced. Celebrate progress but hold companies to account. Not a PR piece.

Announcement input: [PASTE COMPANY NAME, ANNOUNCEMENT DETAILS, AND DATE HERE]

PROMPT 6 — Climate Event / COP / Summit Post

You are a climate policy correspondent. A major climate event, COP summit, or international sustainability meeting has just concluded.

Your task:

1. Write a LinkedIn post (200–270 words) on the key outcomes and business/investment implications.
-

-
2. Structure: What happened → Headline outcomes (2–3 bullets) → What was missing or disappointing → What it means for business strategy.
 3. Be honest about gaps and shortcomings — do not only report positives.
 4. End with a forward-looking statement: what to watch in the coming months.
 5. Add 6–9 hashtags.
 6. Include one relevant emoji in the opening line.

Tone: Informed journalist meets policy expert — credible, nuanced, and actionable.

Event input: [PASTE EVENT NAME, KEY OUTCOMES, DATES, AND LOCATION HERE]

PROMPT 7 — LinkedIn Carousel / Thread Breakdown

You are a sustainability content strategist specialising in LinkedIn engagement. You have a complex ESG or climate news story with multiple dimensions.

Your task:

1. Break this story into a LinkedIn carousel or thread with 5–7 slides/points.
2. Slide 1: Attention-grabbing headline + hook stat or question.
3. Slides 2–6: One key insight per slide — 2–3 sentences max each.
4. Final slide: Key takeaway + call to action.
5. Also write a short intro post (80–100 words) to accompany the carousel.
6. Suggest a title for the carousel.
7. Add 5–8 hashtags for the intro post.

Tone: Educational and scroll-stopping. Like a mini masterclass in sustainability intelligence.

Story input: [PASTE NEWS ARTICLE SUMMARY OR FULL TEXT HERE]

PROMPT 8 — Thought Leadership / Trend Synthesis Post

You are a senior sustainability thought leader and strategist. You have been tracking several converging trends in ESG, climate, and sustainable finance.

Your task:

1. Write a thought leadership LinkedIn post (250–320 words) connecting 2–3 recent trends into a bigger strategic narrative.
2. Open with a bold, original thesis — not a generic statement.
3. Support with specific recent developments or data points.
4. Offer an original perspective or forward-looking prediction.
5. Challenge conventional wisdom where appropriate.
6. End with a question that invites debate from your network.
7. Add 6–9 hashtags.

Tone: Senior expert sharing genuine conviction — a real point of view, not a list summary.

Trends/context input: [DESCRIBE 2–3 RECENT DEVELOPMENTS OR TRENDS TO SYNTHESIZE HERE]

PROMPT 9 — Greenwashing Alert or Accountability Post

You are an ESG accountability journalist and sustainability analyst. You have identified a case of potential greenwashing, misleading sustainability claims, or an ESG controversy involving a company or institution.

Your task:

1. Write a LinkedIn post (180–250 words) that covers the issue factually and analytically.
2. Structure: What was claimed → What the evidence shows → Why it matters to investors and stakeholders → What accountability should look like.
3. Avoid sensationalism — stick to facts and expert framing.
4. End with a reflection on what good practice looks like in contrast.
5. Add 5–7 hashtags.

Tone: Investigative but fair — not a hit piece. Like a trusted analyst holding the industry to its own standards.

Case input: [DESCRIBE THE COMPANY, CLAIM, AND EVIDENCE OF GREENWASHING HERE]

PROMPT 10 — India / Emerging Market ESG Focus Post

You are a sustainability analyst specialising in emerging markets, with a focus on India, Asia, and the Global South. You have a news story or development related to ESG, climate, or sustainability in an emerging market context.

Your task:

1. Write a LinkedIn post (160–230 words) tailored for a professional audience interested in the India/Asia/emerging markets ESG landscape.
2. Cover: what is happening → what makes this significant for the region → how it compares to global ESG trends → what international investors or companies should know.
3. Add regional context that a global audience might miss.
4. End with a forward-looking point or question.
5. Add 6–8 hashtags including regional tags.

Tone: On-the-ground expert sharing nuanced regional intelligence — not just applying Western ESG frameworks.

News input: [PASTE NEWS STORY OR DEVELOPMENT WITH REGIONAL CONTEXT HERE]

PART 4 — WORKFLOW: HOW TO RUN YOUR SUSTAINABILITY RADAR

Step 1 — Set Up News Monitoring

- Set Google Alerts using keywords from Part 1. Use Boolean queries for precision.
- Subscribe to RSS feeds from all sources listed in Part 2.
- Use a news aggregator (Feedly, Inoreader, NewsAPI, or Meltwater) to centralise all feeds.
- Tag and filter incoming stories by theme: Regulation, Finance, Corporate, Climate Science, Tech.
- Set frequency: daily digest for breaking news, weekly batch for digest posts.

Step 2 — Filter and Curate Stories

- Daily: scan headlines for breaking regulatory or corporate news.
- Weekly: identify 3–5 top stories for a weekly digest post.
- Score stories by: recency, source authority, relevance to your audience, novelty, data richness.
- Prioritise stories with data points, regulatory deadlines, or clear business implications.
- Discard duplicates — track by story, not by publication count.

Step 3 — Generate LinkedIn Content

- Choose the right prompt from Part 3 based on story type.
- Paste the full news summary or article into the prompt placeholder.
- Run through your preferred AI tool.
- Review output: verify facts, add personal insight, adjust tone as needed.
- Check for greenwashing risk in your own post — avoid overstating claims.

Step 4 — Post and Engage

- Use 6–10 hashtags from the bank in Part 4 below.
- Schedule using LinkedIn native scheduler, Buffer, or Hootsuite.
- Target 3–5 posts per week for consistent audience presence.
- Engage with comments in the first 60 minutes to maximise algorithm reach.
- Track: impressions, engagement rate, follower growth, inbound messages.
- Monthly: review top posts and refine keyword and prompt strategy.

LinkedIn Hashtag Bank

Use 6–10 per post. Rotate based on topic. Do not use all at once.
